

## ARB Single Compressor Switch Plate - Installation Instructions

Tools required for installation:  
4mm allen wrench, 10mm wrench

### Step 1

Remove one of the stock manifold bracket bolts (**RED** Circle) using a 10mm wrench and replace with the included 6mm bolt and washer. Do not tighten fully.

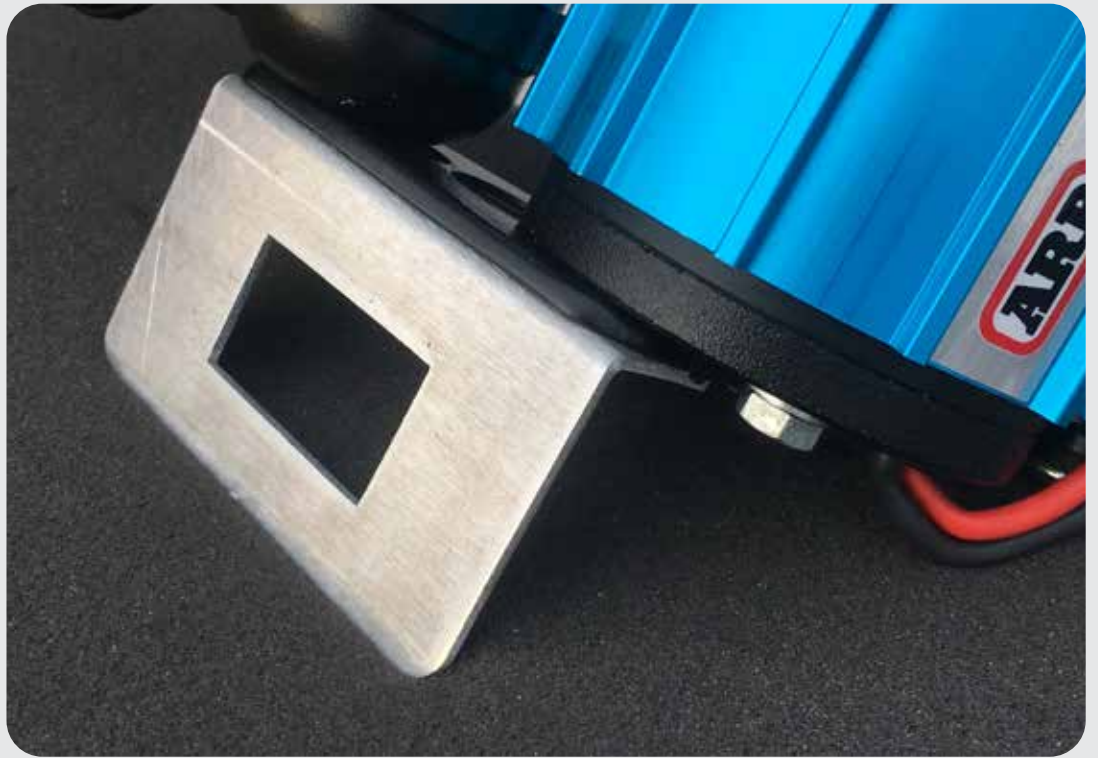

Next loosen the black manifold bolt using a 10mm wrench (**Green** Circle). DO NOT REMOVE the bolt, it is long.

Once both the manifold bolt and the 6mm screw are loose, slide the switch bracket into place and tighten the bolt/screws.

## Step 2

Final install should look like the images to the right. Enjoy!
